

FS-91C Hydraulic Hose Crimping Machine

Products Feature:

1. Facing the problem that it's inconvenient to add the lubricating oil on the annular machine, our technicians add the self-filling oil cup, in which can fill oil automatically.
2. Considering the phenomenon that the hose crimpers are always use for crimping the non-standard bend. We add the large opening and passing ability.
3. Moreover, we know that if the zinc on the working surface loses, the working surface and cylinder will be damaged. However, our machine can avoid this problem. There are tow reasons. (1) We add the oil groove on the die base. (2) We add the base-protective resin gasket between the die bases.
4. The new bracket for machine completely changes the drawback that we must connect the machine and bracket by weld.

Technical data:

Types	FS91C Hose Crimping Machine
Crimp range	1/8" ~ 2" 4SP
Stand voltage motor	380V/4KW
Opening without dies	120MM
Opening	28MM
Swaging force	5300KN
Open time	1.5S
Close time	8S
Die profile	91 series, 10sets
Optional voltage motor	220V/2.2KW
Systematic pressure	31.5Mpa
Weight	280kg
Noise level	65dB
